

The graph illustrates the performance of different active learning methods as a function of the number of added datapoints. The Oracle method consistently achieves the highest AUC, while the other methods perform similarly, with BALD showing the lowest performance among the compared methods.

Method	AUC
Oracle	0.501
Random	0.45
margin	0.45
Entropy	0.449
coreset	0.453
TypiClust	0.437
badge	0.454
BALD	0.435
